

Key: Police comments, [HSE comments](#), [Fire comments](#), [Parent \(Mr. Reicroff\)](#)

Prevention and Early Intervention:

adult – Family Services, MHAGI

youth – Noble of IN, Promising Futures, Aspire, Family Services, [DARE Officers \(SROs\)](#), [Peyton Reicroff Foundation](#), [Zero Suicide Grant](#), [MHAGI](#)

Home, community & outpatient office services

adult – Aspire, CHNW, Proactive Resources, Promising Futures, Dr. Knowles- Duncan, [Serenity Medical Group](#), [IN Health Group](#)

youth – Promising Futures, Aspire, CHNW, Proactive Resources, [CHNW Wrap Around](#), [Dr. Knowles-Duncan](#), [Serenity Medical Group](#), [IN Health Group](#)

School based services

adult

youth – [Positive Behavior Support System \(PBIS\)](#), [Center for Hope](#)

Residential services

adult

youth - CHNW

Crisis & Emergency services

adult – Aspire, CHNW, VA, St. V

youth – Aspire, CHNW, St. V

Inpatient services

adult – CHNW, VA, St. V

youth – St. V

Other Special Programs

adult – CHNW - EAP

youth – Brook's Place, Chauncey's Place, [Youth Assistance Program](#), [ICART](#), [CHNW - EAP](#)

Addiction

adult – Aspire, CHNW, Fairbanks, Harbor Light, AA/NA, St. V, Broad Ripple Counseling, Comm. Addiction Services, Sober Life Alternative

youth – AA, CHNW, Fairbanks, NA, Aspire, St. V, Comm. Addiction Services, Sober Life Alternative

- Some of these facilities have sliding scales, many not available in Fishers (Greenwood, downtown)

Where are the gaps?

Police:

- Do they call back? Do they make contact? Do they get help? Follow up
- “Not quite in crisis”
- Sustained treatment/treatment plans
- Identification – are we asking the right questions at school?
- Technology connections with role models

One thing that would help the most:

HSE Schools:

- Teacher preparedness
- Speech to access services – Lack on parent’s standpoint? Lack of providers?
- Written consent to contact specialty providers and communicate with all agencies – privacy & info sharing
- Schools involvement in safety planning
- Stereotypes/perceptions of speaking up
- Lack of peer-to-peer involvement/encouragement
- Support groups with students
- Training issue between access/psychiatrist

One thing that would help the most: work with partners so we can avoid the crisis

Fire:

- Allowing mental health to be addressed as a society so it isn’t internalized
- Out of 16 resources we can only meet 5 – traditional EMS can’t meet the needs of mental health
- Request to do audit reviews on mental health cases
- Mental health education in medic program
- “1 size fits all” response model/destination – how can we approach a mental health patient?

- Is the emergency room the appropriate destination? What would alternative destinations be? Could we work to change project models and protocols?
- We Care mental health component for follow-up assessment – how to meet their needs in the first 72 hours?

One thing that would help the most: Change the culture

Mr. Reicroff:

- Other experienced parents willing to guide
- Connection with school nurses
- Faith based organizations
- Friends ask friends App
- Affordable health coverage – insurance – no free/low cost options
- Lack of healthcare professionals

One thing that would help the most: remove the stigma, educate through fear and catalyst action

Faith Based:

- Knowing what services are available and create a culture where it's okay to have issues and own those issues
- Text-in service: Soul Medic Media live during the event

One thing that would help the most: comprehensive service contacts

[Healthy Hamilton County]

Community Health:

- Psychiatrists don't see most mental health patients; usually treated by Pediatrician and/or PCP
- Lack of social workers/professionals
- Marion Glick – sponsor an phone enabled web resource for anonymous conversations that can reach the youth/expression – technology is available but who is the expert on the end of the other line and are they available?
- Commercial insurance the hardest to service
- State-wide plan

Action items: improved training, stigma, videos, technology

Mayor:

- AT&T & Launch Fishers hack-a-thon
- No real ownership of a strategy, fragmented in goals/resources and paths – how can we mobilize and coordinate all of the resources together?
- No sustainability, systemic solutions in place

One thing that would help the most: list of clearly actionable items

Priorities (possible objectives?):

1. Comprehensive plan
2. Eliminate the stigma/Change the culture
3. Sustainable solutions
4. List of resources
5. Catalyst action

April 28

Think about what objectives should be and what could fit under those objectives. Action, owner, due date and accountability team.
